Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;

Claim 13

The invention of claim 13 appears to involve an inventive step over document 1 cited in the ISR.

Document 1 does not describe an organic/inorganic hybrid polymeric material manufactured by hydrolyzing and polycondensing polyester or polycarbonate having in a main chain a specific unit with a reactive silicon-containing group. However, because of this feature, the invention of the present invention has the advantageous effect of having a high degree of cross-linking in which covalently bonded microscopic metal oxides are mutually micro-dispersed.
